

Are you in revenue cycle denial?

Accelerating claims processing is a goal of most RCM business offices. But there's one major hurdle:

DENIALS MANAGEMENT

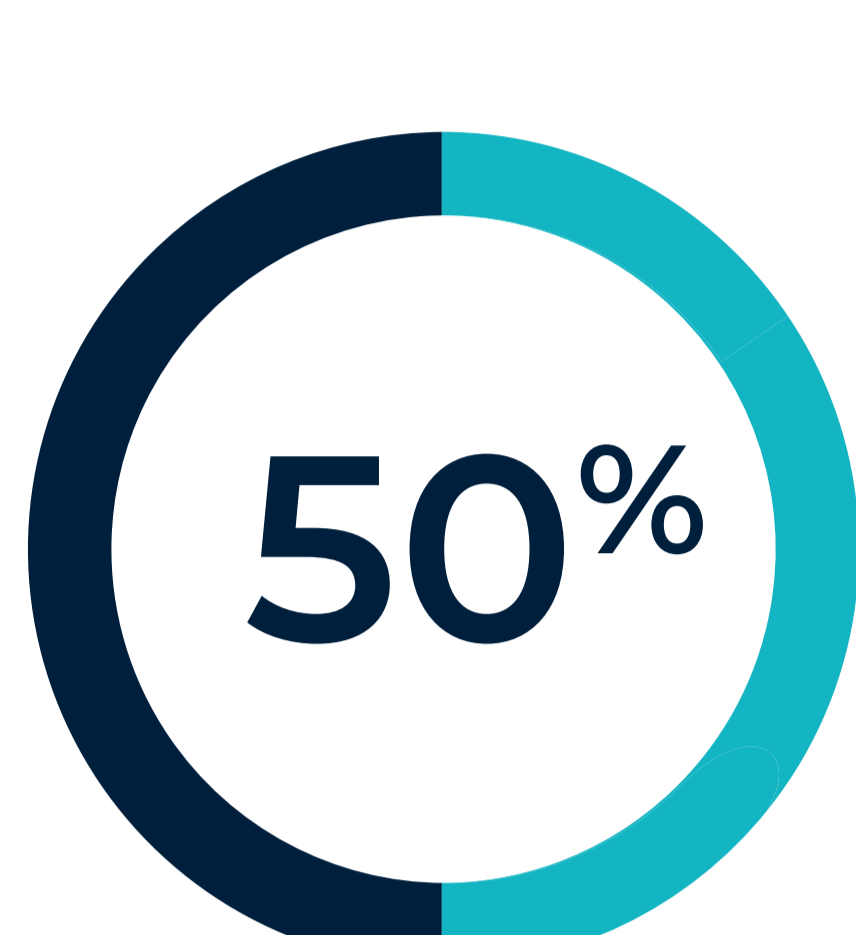

76% 

of healthcare leaders

say denials management is the **most time-consuming** RCM task

[AKASA](#)

And the burden is only getting worse.

of providers saw their **denials rate increase** in the past year

[AKASA](#)

12% of all claims **are denied**

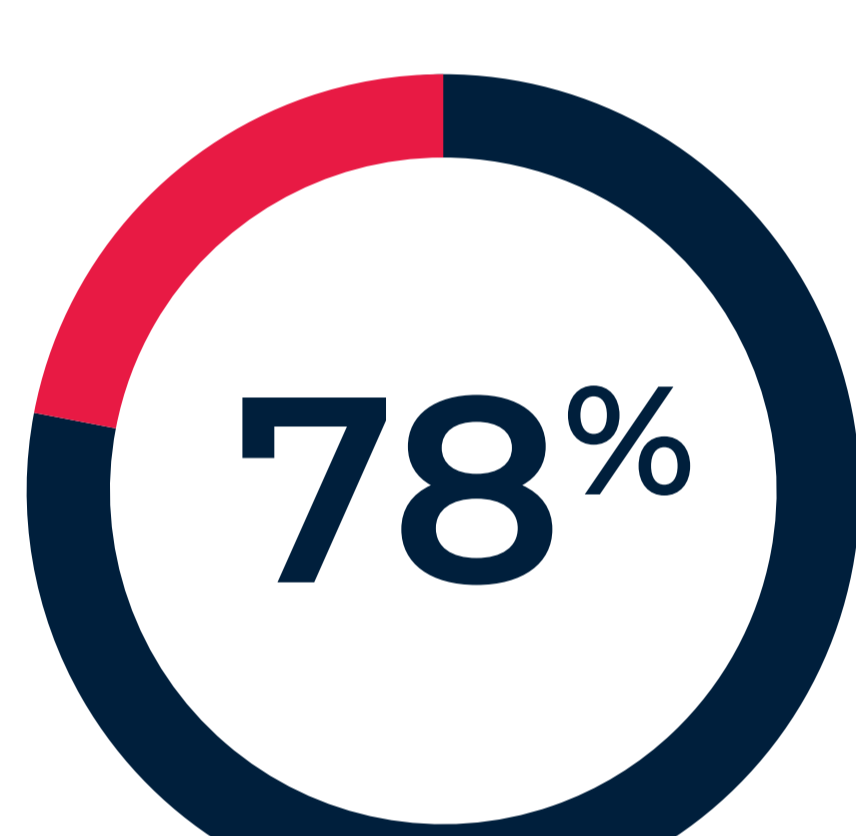

[CHANGE HEALTHCARE](#)

Top **3** reasons for initial payer denials:

- 1** Errors in patient access/registration (i.e. eligibility or missing prior authorization)
- 2** Lack of documentation to support medical necessity
- 3** Missing or incorrect patient information

[AKASA](#)

This isn't a problem you can throw more people at.

of providers say **denials management requires more expertise** than other RCM tasks

[AKASA](#)

60% of healthcare leaders have **100+ open roles** in operations

[AKASA](#)

You need to find new solutions — like advanced, AI-powered automation that just gets the work done.

61% of healthcare professionals

say **denials are increasing** due to a lack of automation in the claims/denials process

[EXPERIAN](#)

62% are not currently automating denials management

BUT 76% of those plan to do so by the end of 2024
